

# TALK AND PLAY

A Special Program for Parents & Toddlers!

## About the Program

**We're here to help you discover fun and effective ways to support your little one's communication skills. Our goal is to make sure your child becomes a confident talker!**

In 'Talk & Play,' you'll get to learn all about how children develop their communication skills. We'll share valuable tips and tricks that you can use at home to encourage your child's talking abilities. This program is designed for kids aged **15 months to 3 years** who might be taking their time with talking—we call them 'late talkers.'

The best part? We have **hands-on group sessions** where you and your child can join in the fun! Imagine it as a playdate filled with activities that help your child talk more. Two friendly speech pathologists will be there to guide you every step of the way. It's a fantastic chance for you and your child to learn and play together, all while boosting those important communication skills.

So, let's embark on this exciting journey together! 'Talk & Play' is not just a program; it's a supportive space where you and your child can grow and thrive. We're thrilled to be part of your adventure in building strong and confident little talkers. **See you at 'Talk & Play!'**
